

Dimitrios and Georgia Kaloids, who have no children of their own, have more than exemplified the characteristics of the Phidippides Award. Their involvement in education plays a substantial role in the growth of future generations of the Hellenic community.

Mr. Speaker, I am honored to bring to your attention the important charitable work Georgia and Dimitrios Kaloidis have done for the Hellenic community. I am proud to have such citizens in my district.

TRIBUTE TO DR. ELIZABETH  
KARLIN

**HON. ELEANOR HOLMES NORTON**

OF THE DISTRICT OF COLUMBIA  
IN THE HOUSE OF REPRESENTATIVES

*Friday, October 9, 1998*

Ms. NORTON. Mr. Speaker, Dr. Elizabeth Karlin, a physician and humanitarian, who possessed uncompromising compassion and belief in humane medical treatment for women, died of a brain tumor on July 27, 1998. She was 54 years old. Elizabeth Karlin

was a mother of two children, an impresario of folk music, a general practitioner of medicine in rural Tanzania, an internist specializing in endocrinology, an abortion provider, and a national leader in the movement to provide access to abortion as part of a full range of health services for women and families.

Dr. Karlin served as Director of the Women's Medical Center in Madison, Wisconsin. She was a founding member of the Board of Directors of Physicians for Reproductive Choice and Health and a Clinical Assistant Professor in the Department of Internal Medicine at University Hospitals in Madison. She received her BA from Antioch College and graduated with honors from the University of Wisconsin Medical School. The American Medical Women's Association awarded her its Reproductive Health Award in 1993 and its highest honor, the Elizabeth Blackwell Award in 1996.

Because of her outspoken belief in providing the best possible care for women faced with unintended pregnancies, Elizabeth Karlin was targeted by extremists, who stalked her in her neighborhood and staged protests in front of her home. In a New York Times article in

1995, Dr. Karlin explained why she had chosen such a courageous, but difficult path when she said: "I don't do abortions because it's a filthy job and somebody has to do it. I do them because it is the most challenging medicine I can think of. I provide women with nurturing, preventive care to counteract a violent religious and political environment. I hope to do it well enough to prevent repeat abortions . . . My job is to stop the next abortion. To do this we expect our patients to leave us empowered, more informed, healthier, and, yes, happier than when they came in."

Dr. Karlin testified before the Congressional Women's Caucus in October 1997, urging the importance of American women's access to contraception and new contraceptive research. Following the hearing, the Congressional Women's Caucus, pressed for the full range of contraceptive coverage for federal employees in their benefit plans.

A role model for many and an apologist to no one, Dr. Karlin set a high standard for doctors who strive to provide women with the best medical care possible under the worst of circumstances.
